

AMENDMENTS TO THE SPECIFICATION:

Please add the following paragraph at the bottom of page 16:

As shown in Fig. 2, the rough portions 100 are formed on a first area of the substrate 21 located under the reflective layer 23. A second area of the substrate 21 is maintained as relatively smooth without any rough portions. The switching element that includes the gate electrode 22 is formed on the second area of the substrate 21.
